

Name of the problem statement: Help me with my mood

Team Size: 4

Team Members: Meenakshi.PL

Nandhini. K

Gajalakshmi. V

Muthu. K

Problem Statement Definition:

With the advances in technology about sentiment analysis and predictive analytics, it has opened many avenues for researchers and enterprises to understand human mental state better. This helps to know the emotion/mood of a person also in eliminating any negative state of mind that might have adverse effect on his/her daily life.

Tools and Technologies:

IBM Cloud

IBM Watson

App development framework for desktop -Java and for mobile (Android, iOS)
